**Tips:****Caution!**

If you have **autofill** selected in your web browser, be sure not to use the autofill when registering multiple people. The autofill feature will overwrite anything (include participant name) when completing the registration form.

**Important Note:**

**Registration fees** will not appear on your personal fundraising page. This was a change that Crowdrise made this year. Only donations made after registering will be applied to your team/individual fundraising totals.

While fundraising is not required, the system does require you to set up a fundraising page during registration. This is how Crowdrise links individuals to teams so you must select either Fundraise as a team or Fundraise as an individual to complete your registration.

Crowdrise works best in Google Chrome (Internet Explorer is not recommended for this purpose as some features of the website will not appear).
